

Good Afternoon All,

Terry Wright, area operations mgr. for HighGrove Partners our Landscaping Contractor, came into our Community this afternoon and by order of Fulton County Water District set our Irrigation System Clocks to water ONE day a week.

This is a drastic measure and practically guarantees that we will lose many plants and some trees if this restriction is in effect for very long.

During this week we will be checking all Clock stations and area zones to insure that we are getting the maximum amount of water for the "ontime" available at each zone and that none is wasted.

It has been decided that while this restriction is in effect it would be unwise to spend any monies planting new or replanting dead or dieing flowers or shrubs in this situation. We can only hope for some relief from Mother Nature.

BOD
